

EXHIBITIONS NAJAVE II WORLD

SICUREZZA AND SMART BUILDING EXPO, NOVEMBER 2021, ALONGSIDE MADE EXPO AT FIERA MILANO

By A&s Adria February 10, 2021 61 No Comment

For optimum synergy and to meet market needs, three events will launch on the same day, November 22nd

Milan, 10 February 2021 – Optimising investments, visiting hours and resources, maximising opportunities for discussion and getting up-to-date, but above all offering the world of designers and installers a comprehensive deal. SICUREZZA, the biennial international security and fire sector exhibition, SMART BUILDING EXPO, the home and building automation and tech integration event, and MADE expo, Italy's leading exhibition for the design sector, have come together choosing to be showcased for the market alongside each other, scheduling their exhibition opening dates on the same day.

SICUREZZA and SMART BUILDING EXPO are being brought forward one day and will be held at Fiera Milano from 22 to 24 November 2021, while MADE expo confirms the dates for its four-day event, taking place from 22 to 25 November.

These coinciding exposés form an unmissable opportunity for the sector, combining the wide range of materials, carpentry and casings on offer at MADE expo, with the building automation, smart home and security&fire solutions and installations featured at SICUREZZA and SMART BUILDING EXPO.

Throughout their visit, participants will be able to check out a comprehensive exhibition that combines active and passive solutions, so they can gain a full understanding of new developments and their potential, and even gain access to exclusive, dedicated training sessions.

The events will take place at Fiera Milano from 22 to 24 November 2021 for SICUREZZA and SMART BUILDING EXPO, and from 22 to 25 November for MADE expo.
